**Subject: assessing of the supply and commissioning of SMOC imaging detector,
made by ImagineRT Sp. z o.o**

TTA Techtra has placed an order for the SMOC imaging detector in February 2015. The contract included the supply, installation, adjustment of the detector to the radiation source and the training of our personnel.

Delivery was made on time, all obligations were carried out correctly with the utmost care. This device complies with established requirements, works fine with remaining technical infrastructure of NDT laboratory.

SMOC_40x40_HE imaging detector delivered by ImagineRT Sp. z o.o is an example of a well-thought-out device matched to the needs of the recipient. The process of delivery and commissioning was made very professionally. The training was conducted according to users' needs and requirements.
